

PROFESSIONAL LIFTING EQUIPMENT

WHEN SAFETY DEPENDS ON PERFORMANCE!

72674

1,250 Lbs. Capacity Powertrain Lift / Table

INTENDED USE

The powertrain lift/table not only handles transmissions and fuel tanks, but also engines and transaxles, rear ends and leaf springs. Also serves as a work table where the components can be lowered to a stable and secure work height for repair.

FEATURES

- Fingertip control for both pressure and release operations provides finer control of raising or lowering loads.
- Safety overload system in the air/hydraulic pump prevents jack from being used beyond the load-limiting standard.
- The pump can be removed from its holder and placed closer to the lift saddle, leaving hands free to accurately position the load.
- Fully adjustable saddle with two ratchet tie-downs secure the load to the saddle.
- Four easy rolling caster wheels (locking rear caster wheels) provides stability and easy maneuvering in its lowered position.
- The wheels, made from a phenolic resin, offer high impact resistance and are non-marking for protection of tile and epoxy floors.
- The optional model 72508 Fuel Tank Saddle Adapter can be quickly and easily installed.
