

PROFESSIONAL LIFTING EQUIPMENT

WHEN SAFETY DEPENDS ON PERFORMANCE!

76721A

20 Ton Capacity *Ultra Low Height* Air Operated Hydraulic Bottle Jack

INTENDED USE

Made specifically for automobile haulers that use trailers that are very low to the ground.
"Car haulers love our jacks!"

FEATURES

- Made for all applications that require a low lift height.
- Fast efficient air pump reduces lifting time and has a built-in relief mechanism which prevents the jack from being used beyond its maximum allowable capacity.
- Convenient push button air valve connected to an in-line filter prevents contaminants from entering the air/hydraulic system.
- Unique design allows for manual operation when air is not available.
- Two-piece zinc-plated handle.
- Parkerized coating on pump piston and chrome coated ram offer protection against rust.
- Longer wear life due to internally machined oil passages, smooth bearing surfaces and close tolerances.
- Safety bypass and overload systems prevent cylinder damage and prevent the jack from being used beyond the ASME/PASE load-limiting standard.
- Carrying handle.
