

PROFESSIONAL LIFTING EQUIPMENT

WHEN SAFETY DEPENDS ON PERFORMANCE!

72036C

4 Ton Capacity Forklift Jack

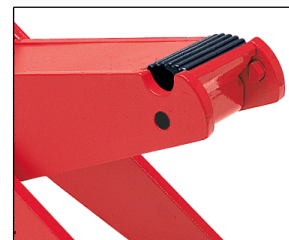

INTENDED USE

*A jack with a low enough
profile to raise forklifts.*

TWO-POSITION SADDLE @ SCISSORS END

Lifts at edge

Lifts flat surfaces

FEATURES

- Two-position saddle at scissors end can be quickly rotated to handle either edges or flat surfaces of a load.
- 2-1/4" low lift height at scissors end.
- Removable handle for ease of pumping and storage when not in use.
- Our "fingertip control" release knob provides slow, controlled lowering of the load.
- Safety bypass and overload systems prevent cylinder damage and prevent the jack from being used beyond the ASME/PASE load-limiting standard.
